DESCRIPTORS: "Satellite vehicle trajectories," "Atmosphere, Motion, Satellite vehicles"

The purpose of this article is the calculation of the influence of atmospheric resistance on the major semi-axis (a) and the eccentricity (e) of the orbit of an artificial satellite of the earth. In an article by Y. C. Chang and Chia-hsiang Chang (1957) such a calculation was made with accuracy to the first order of eccentricity and only the secular perturbations of a "nonisotropic" satellite vehicle.
